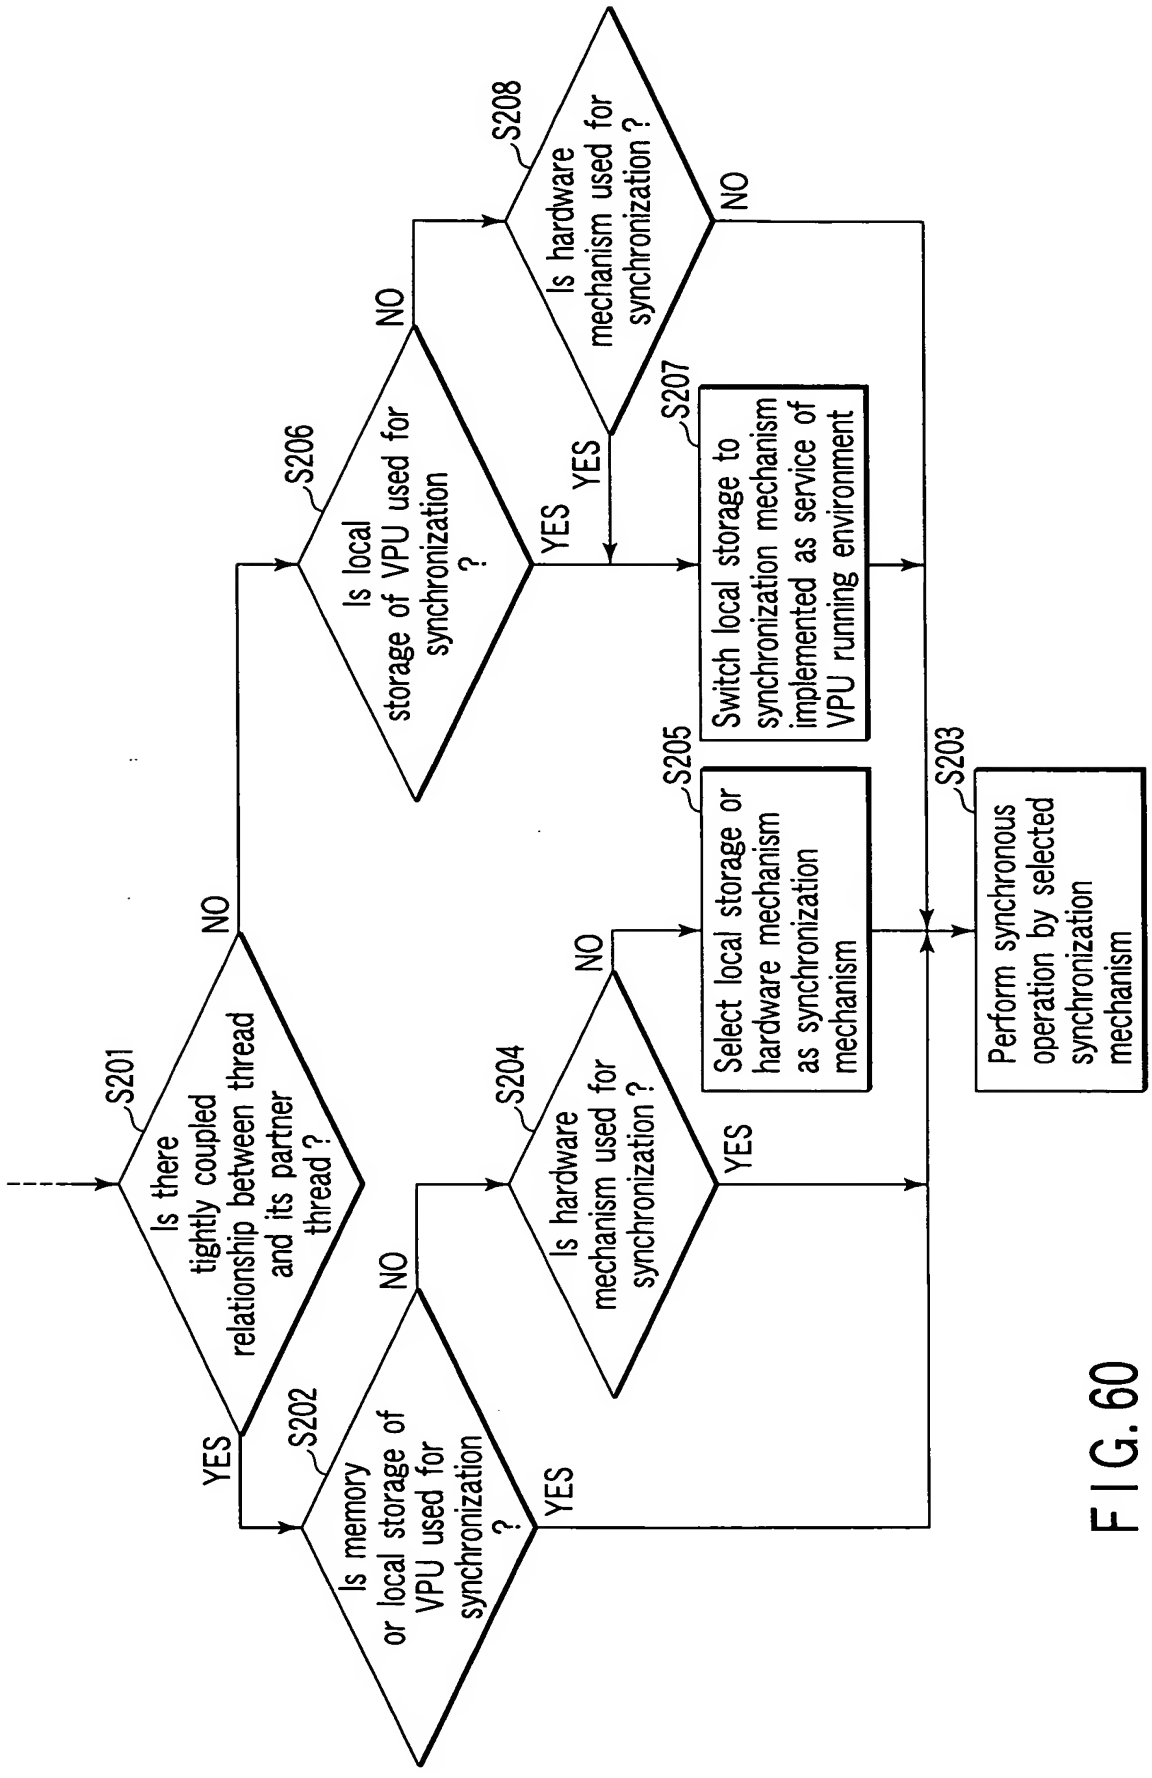
		Tightly coupled thread group	Loosely coupled thread group
On memory	LS	Can use	Cannot use
	MS	Can use	
Other		Should use hardware primitives	Should use mechanisms provided by VPU Runtime Environment

FIG. 59



S201
Is there tightly coupled relationship between thread and its partner thread ?
YES
NO
S202
Is memory or local storage of VPU used for synchronization ?
YES
NO
S204
Is hardware mechanism used for synchronization ?
YES
NO
S205
Select local storage or hardware mechanism as synchronization mechanism
S206
Is local storage of VPU used for synchronization ?
YES
NO
S207
Switch local storage to synchronization mechanism implemented as service of VPU running environment
S208
Is hardware mechanism used for synchronization ?
YES
NO
S203
Perform synchronous operation by selected synchronization mechanism
